

Sociology Exercise

Crime is something that many people have a concern about, indeed a great many people have a fear of crime which negatively impacts on the quality of their life

This exercise is to enable you to explore crime and the area in which you live.

- **Do you think there is a lot of crime where you live?**
-
- **What sort of crimes do you think take place where you live.**
-
- **Now look at <https://www.police.uk/>**
- **Put your postcode into where it says ‘find your neighbourhood’**
-
- **You should now be given a crime map of your area from which you can find the types and extent of crime in your area.**

Now create a digital poster that incorporates the area – e.g photos of what the area looks like and pictures of the types of crime found there – include

any local newspaper article of crime in that locality.
